

NAMAN KHATER

SOFTWARE ENGINEER

naman22khater@gmail.com

(+91) 958-604-8530

PROFILE

Engineered scalable low-code and full-stack applications using Angular, ASP.NET, and modern web frameworks. Reduced feature delivery time by 30%, boosted system performance by 20%, and implemented AI-driven modules that maximized user interaction efficiency by 40%. Delivered production-grade solutions in e-commerce and loan management, reducing transaction and processing times by up to 15% through optimized background automation.

EXPERIENCE

GEP Solutions | Software Engineer | Mumbai, India 2023.06 - Present

- Engineered low-code solutions using Angular and ASP.NET, accelerating feature development by 30% and streamlining client customization.
- Resolved complex design constraints in low-code modules, managing the full development lifecycle and enhancing system scalability by 20%.
- Partnered with the Generative AI team to deliver AI-powered upgrades that improved usability and elevated product efficiency by 40%.
- Refactored and fine-tuned legacy systems, raising code quality standards while reducing technical debt by 25% and bulk processing time by up to 40%.
- Coordinated with cross-functional teams to translate business requirements into solutions, playing a pivotal role in a record-setting customer onboarding which completed in 20% less time.

EDUCATION

Sardar Vallabhbhai National Institute of Technology Surat, India
B. Tech (Computer Science and Technology) 2019-2023

- Learnt Data Structures and Algorithms (DSA) and Agile software development methodologies in academic and project work, with the potential to improve software performance and accelerate delivery timelines by up to 25%.
- Led the Microsoft Student Chapter at NIT Surat, promoting the adoption of emerging technologies among students through workshops, seminars, and hands-on projects impacting over 2000 students.

PROJECTS

E-commerce platform2023

- Created a modular website starter template that reduced setup time by 50% for new projects, enabling faster go-to-market for clients.
- Integrated payment gateways and order management systems into an e-commerce platform, reducing transaction time through background task processing and improving efficiency by 10% - 15%.

Skills: ReactJS, NodeJS, MongoDB, Docker, NextJS.

Loan Management Software2022

- Built a full-stack Loan Management Application, reducing manual tracking by 70% and providing users with a dashboard that elevated loan data accessibility and reporting efficiency.
- Designed and implemented secure authentication and authorization features, ensuring data privacy and regulatory compliance.
- Automated loan processing workflows, decreasing manual intervention and reducing processing errors by 60%.
- Programmed robust reporting tools, enabling stakeholders to generate real-time financial and compliance reports.

Skills: Angular, NodeJS, MongoDB, AWS.

SKILLS

Programming: Python, C, JavaScript.

Frontend: React, Angular, NextJs, HTML, CSS, JavaScript.

Backend: NodeJs, Django, ASP.NET.

Clouds and Databases: AWS, Azure, SQL, MongoDB.

DevOps: Docker, Jenkins.

Developer Tools: Postman, Chrome Dev Tools.

Version Control: Git, GitHub.

POSITIONS OF RESPONSIBILITY

1. **Lead** - Microsoft Learn Student Ambassador, SVNIT 2021-2022.
2. **Head** - Sponsorship Committee (Cultural Festival SVNIT) 2021-2022.
